## JUST A LITTLE

each week in bank increases your independence—decreases the need for worrying about a rainy day.

A dollar a week will soon equal a week's salary. Two dollars a week amounts up to a tidy sum just proportionately as time flies, and that's pretty fast.

But as fast as time flies, opportunity flies faster. So, better start saving while you are making.

Putting money in bank is putting a bulwark between you and adversity.

And this is a National Bank—protected by the United States Government.
